

First, log in page

A window titled "first.fxml" with a standard macOS-style title bar (red, yellow, green buttons). It contains two text input fields: "Username" and "Password". Below the fields are two buttons: "Log In" (highlighted with a blue border) and "Create".

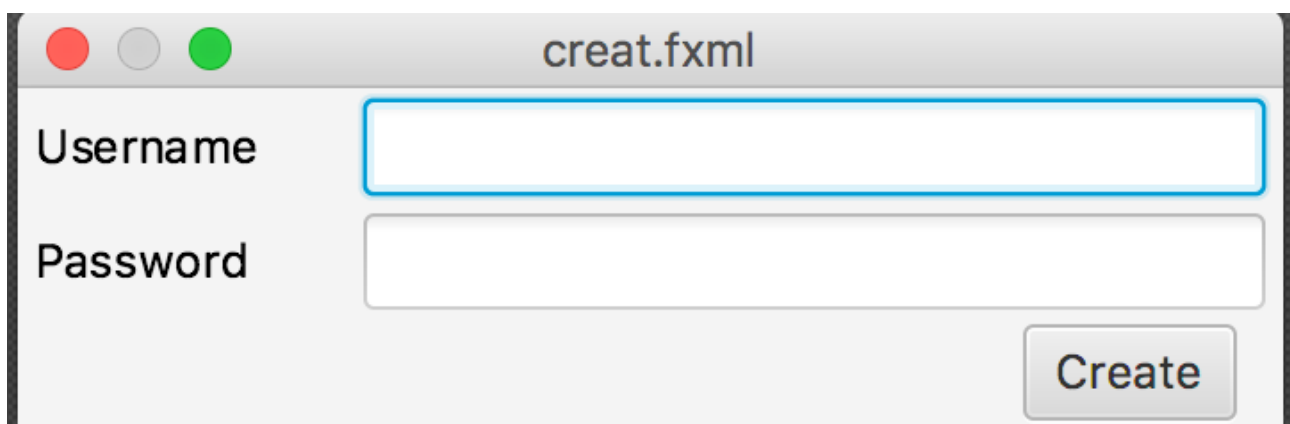

If the user do not have the user name, he/she need create a new account, otherwise, he/she could just log in, if a person don't have a user name or the wrong password but trying to log in, it will be an error message.

The Error Message:

A window titled "errorFirst.fxml" with a standard macOS-style title bar. It displays an error message: "Error: The password did not match the Username. Please enter your Username and Password again." Below the message is an "OK" button.

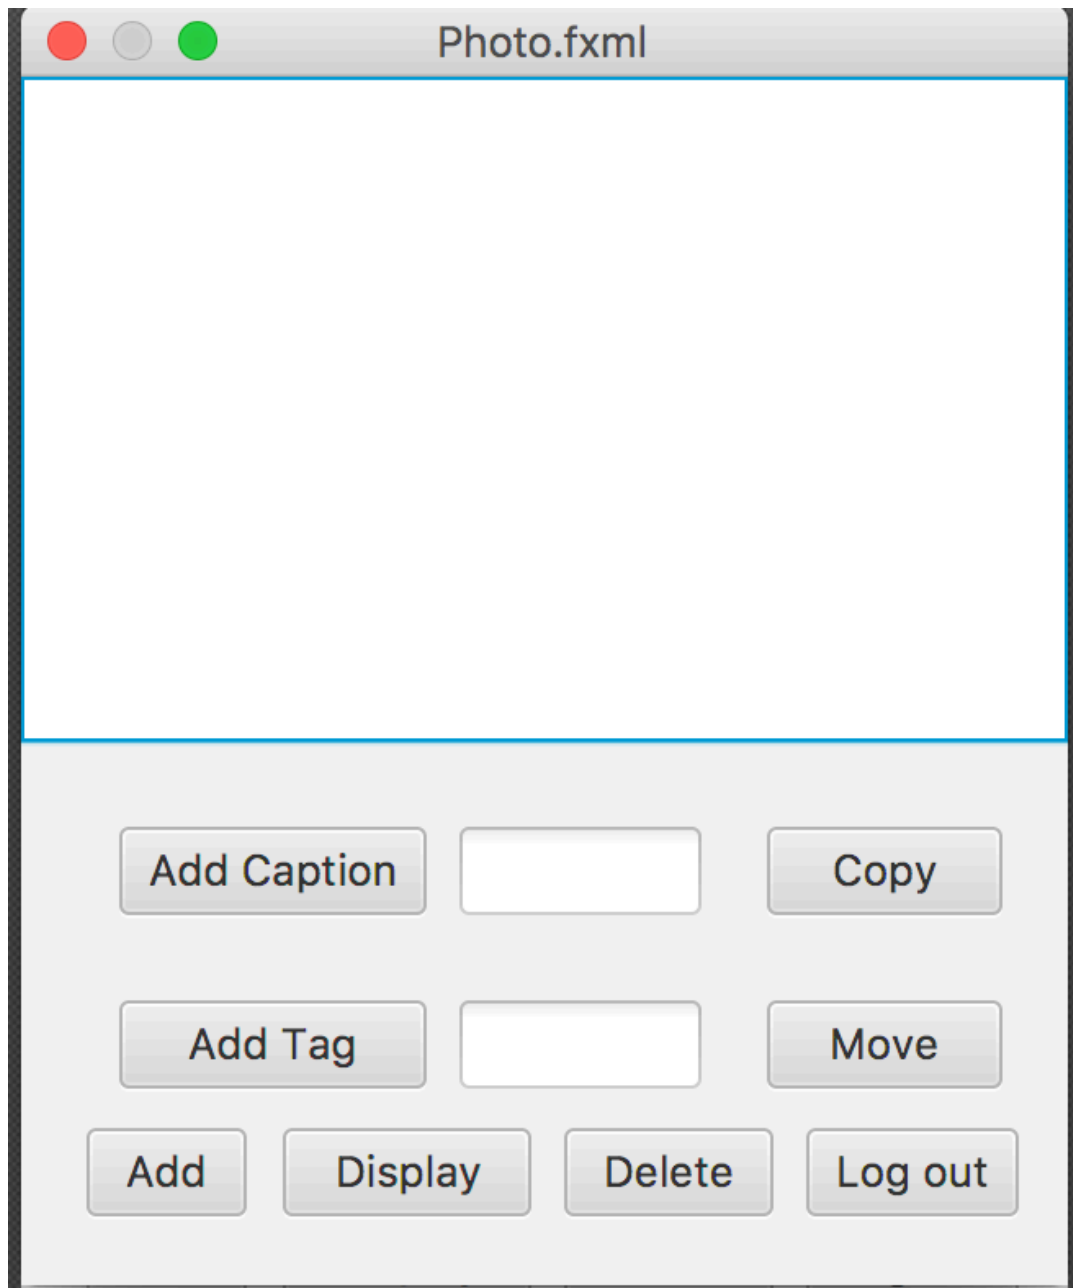

To create a new account:

A window titled "creat.fxml" with a standard macOS-style title bar. It contains two text input fields: "Username" and "Password". Below the fields is a "Create" button.

Also, if the Username has already existed, it will show the error message:

Then if a person successfully log in, it will show this page :

It can add Caption and Tag, It can move, copy.
It can add or delete photo and display photo.
When it logout, it will go back this page:

A login window titled "first.fxml" with a standard macOS-style title bar (red, yellow, and green buttons). The window contains two text input fields: "Username" and "Password". Below the "Password" field are two buttons: "Log In" (highlighted with a blue border) and "Create".
